# SEASON'S GREETINGS FROM **OUR CO-OP FAMILY TO YOURS**

"The holidays." I love everything about this time of year. Just the thought of the holiday season brings a smile to my face and evokes a sense of comfort and nostalgia. Recalling family gatherings and traditions warms my heart and fills my

It's a time of reflection. As we look back at the past year, South Dakota's electric cooperatives are grateful for the opportunity to serve our members and are driven by a sense of mission and purpose. Our team feels a strong connection to our community and our members, because we live here, too.

**Trevor Jones** General Manager

While many of our community-focused programs and activities ramp up this time of year, we have several programs and services in place to help our members yearround. I'd like to remind you about some of these offerings in hopes you'll find them beneficial.

Many of our cooperatives offer an app that empowers you to monitor, manage and pay your energy bill conveniently through your phone. Another service many co-ops offer is prepaid metering, which is intended to help budget your monthly energy costs. Members can pay for electricity before it's used, then use the electricity until the credit expires. During the time period paid for, you'll receive regular feedback on your balance. There are also energy

efficiency programs designed to save you money and energy.

Our Operation Round Up program helps direct financial support to organizations in our service areas. By simply choosing to "round up" their energy bills to the next whole dollar amount, thousands of co-op members like you are helping others right here in our community. Through members' generous donations Operation Round Up funds have gone toward supporting local fire, first responder and law enforcement agencies, youth clubs and organizations and a wide array of charitable entities.

In addition to helping members save today, we're focusing on the future. In our area, we're seeing increased interest in renewable energy sources. Recent innovations and advances have led to significant cost decreases in renewable energy, making it more feasible and accessible. In recent years, we have been able to adjust our power generation fuel mix by incorporating more renewables.

But the most important investment we make throughout the year is in our local youth. Our cooperative employees have logged hundreds of volunteer hours supporting schools, youth clubs and programs along with providing tens of thousands of dollars in scholarships for local students.

For many years through our Youth Tour program, we have sent scores of high school juniors and seniors to Washington, D.C., for a week-long immersion to experience democracy in action. While the Youth Tour has been suspended for the past two years because of the pandemic, this year we were able to offer an alternative program called Connect Con: A Youth Leadership Experience where nearly 30 students from across South Dakota convened at Black Hills State University for a three-day conference.

At the heart of all of these programs is you - the members we proudly serve. Looking back, I'm grateful for so many wonderful community partners and for the positive impact we can continue to make.

This holiday season, I wish you and your loved ones peace, joy and prosperity. Speaking on behalf of all of our employees, management and board members throughout the state, I know the future will be bright because of you.

# Ready your home for a winter break during the holidays

If you're planning to be out of town for an extended period of time during the holidays, take heed of the following recommendations to save some energy and keep your home safe while you're away.

- Set your home's thermostat to 50 degrees. This temperature is a happy midpoint that avoids wasting energy to warm an empty house while still preventing damage to your pipes and plants. If sub-20-degree days are forecast during the time you are away, drip faucets.
- Turn off your electric water heater at the breaker or set it to the lowest temperature possible.
- To avoid a potential fire hazard, unplug the washer and dryer before you leave your home. Disconnect the hoses leading to the washer to prevent them from freezing.
- Unplug all of your small appliances. You'll reduce the risk of a house fire and save a bit on your electric
- Don't broadcast your travel plans on social media. Instead, share photos from your trip after you return.
- If you set a timer for your outdoor or indoor lights, make sure to switch up the times over the days you'll be gone so it's not obvious to any onlookers that the house is empty when lights go on at 6 p.m. every day like clockwork. If possible, stagger several timers that control different lights to approximate the natural movement of someone through a house.
- Close blinds and curtains. Don't advertise your belongings to any would-be house burglars.
- Be strategic about putting out post-holiday recycling and trash. If there are a lot of boxes from new gadgets or other expensive electronics, wait until you get back to put them out so they're not sitting outside in full view for days. Or have a trusted neighbor set them by the curb on the appropriate
- Place a hold on all mail and newspaper deliveries, and ask a neighbor or a friend to pick up any packages from your porch.

# **DID YOU KNOW?**

On Christmas Eve 1923, President Calvin Coolidge began the country's celebration of Christmas by lighting the first National Christmas Tree decorated with electric lights.

### Don't cut down trees by power lines Milo Thompson

Milo reminds electric cooperative members that cutting down trees located near power lines can be hazardous. Milo is the child of Kurt and Rebecca Thompson of Hayti. They are members of H-D Electric.

Kids, send your drawing with an electrical safety tip to your local electric cooperative (address found on Page 3). If your poster is published, you'll receive a prize. All entries must include your name, age, mailing address and the names of your parents. Colored drawings are encouraged.

1/2 cup evaporated milk or cream 1 Tbsp. flour 1 tsp. vanilla

### **METHOD**

Grease and flour a bundt pan or 9 x 13 inch pan. Cream butter, sugar and egg. Beat in flour, milk, baking powder and salt. Fold in cranberries. Spread batter in pan. Bake at 350 degrees about 45 minutes. Bundt pan may need one hour. Serve with butter sauce. For butter sauce, mix flour and sugar. Place all ingredients except vanilla in saucepan. Heat, beating well over high heat until hot and bubbly. Add vanilla. Serve warm over cranberry cake.

Mary Jessen, Holabird

3 tbsp. rice

1 tbsp. butter

1/4 cup raisins

Pinch of salt

### **Topping**

Sugar Cinnamon Milk

### **METHOD**

In a 2-qt. baking dish, add milk, water, sugar and rice. Stir together. Add a pinch of salt and raisins. Bake at 350 degrees for one hour. Take out of oven and add butter. Let sit while you eat main meal. Dish up in bowls, sprinkle with sugar, cinnamon and add milk.

Deanna Dean, Artesian

### **FANCY CHRISTMAS CAKES**

100

Ingredients:

#### Cakes

- 1 pkg. (2-layer size) white cake mix
- 1 tbsp. McCormick® Red Food Color
- 1 tsp. McCormick® All Natural Pure Vanilla Extract
- 1 tbsp. McCormick® Green Food
- 1 pkg. (16 oz.) chocolate candy coating, such as CANDIQUIK®

### **Buttercream**

1/2 cup (1 stick) butter, softened 1 tsp. McCormick® All Natural Pure

- Vanilla Extract 1 pkg. (16 oz.) confectioners' sugar,
- 2 tbsp. milk Pinch of salt

### **METHOD**

sifted

Preheat oven and prepare batter as directed. Divide batter evenly into 2 bowls (about 1-1/2 cups of batter each). Stir red food color and vanilla into first bowl. Stir green color into second bowl. Pour red and green batter into greased 13 x 9-inch baking pans. Gently tap on counter to remove any air bubbles. (If you do not have 2 13 x 9-inch pans, bake one color cake first, then reuse the pan to bake the second.) Bake 6 minutes. Remove pans from oven and tap on counter to remove any air bubbles. Return pans to oven and bake 6-9 minutes longer. Cool in pans 10 minutes. Invert cakes onto wire rack. Cool completely. Refrigerate cakes until ready to assemble. For buttercream, beat butter in large bowl with electric mixer until light and fluffy, about 3 minutes. Add vanilla and mix. Gradually beat in confectioners' sugar on low speed, scraping sides and bottom of bowl after each addition. Add milk and salt; beat on medium-high until light and fluffy, at least 3 minutes. If frosting is too thick, beat in additional milk.

www.mccormick.com

Please send your favorite soup recipes to your local electric cooperative (address found on Page 3). Each recipe printed will be entered into a drawing for a prize in December 2021. All entries must include your name, mailing address, phone number and cooperative name.

Dear Pat and Brad: Our energy bills seem higher than they should be, but I'm not sure where to start looking around my home for opportunities to save energy. Do you have any suggestions? - Les

Pat Keegan Collaborative Efficiency

**Brad Thiessen** Collaborative Efficiency

Dear Les: That's a great question. There are many products and services that claim to provide maximum energy efficiency, so it can be challenging to know where to start. Fortunately, our monthly bills can help identify areas for the most energy savings.

For the vast majority of homes, the months that require the most energy use are in the winter and summer when temperatures are most extreme. Just total up your average energy use for the months when you use the most energy, then subtract the average amount you use during "shoulder months," when you're barely using your heating or cooling system, typically during fall and spring.

The most likely reason for the difference in energy use is heating and cooling your home. If someone says switching to a new heating or cooling system could save you 20 percent, they likely mean you can save 20 percent on heating or cooling costs, which are a portion of your overall energy costs.

Every home is different. For example, there's a small percentage of homes that include uncommon energy uses like a well pump, swimming pool or a home business that requires more energy than heating or cooling. But typically, heating and cooling your home are by far the largest energy uses.

Sealing air leaks is often the least expensive energy-saving measure that delivers the most bang for your buck.

The second most cost-effective way to cut heating and cooling costs depends on your situation. If you have an older propane or oil furnace, replacing it with an energy efficient heat pump might be your best investment. If you already have an efficient furnace or

air conditioning unit, insulating your attic could be the next most cost-effective measure, followed by insulating exterior walls or the crawl space or basement.

Replacing windows is a high-priority project for many homeowners, and new windows can certainly add value to your home. However, this can be a costly project, making it difficult to justify solely based on potential energy savings. If your windows are old and leaky, it could be worth the investment. Do your research upfront so you fully understand the costs of the project.

After you've found ways to reduce your heating and cooling costs, where else should you look for energy savings? Your next largest energy use is likely water heating. A few low-cost measures like repairing leaky faucets and insulating the first 6 to 10 feet of hot water line could deliver significant savings. Installing energy efficient showerheads can save water and reduce energy use. Check out Consumer Reports for reliable comparisons and reviews of energy efficient showerheads.

If your water heater is more than 10 years old, it's likely time to consider how and when to replace it. You can purchase a traditional water heater that uses the same fuel you're using now. But there are several other options, including heat pump water heaters, tankless water heaters and even solar water heaters. Be sure to do some research before your water heater breaks so you know about your options.

Appliances and lighting account for a smaller portion of your overall household energy use. As you replace older appliances and lighting, look for options that include the ENERGY STAR® sticker. You should also review energy use information found on the EnergyGuide label.

We hope this information will help you start to identify areas to save energy at home. Consider enlisting the help of an energy auditor who can provide an overall assessment of your home's efficiency.

Ben Hanten, left, has expanded his craft brew business in Yankton and reports record sales. Photos provided by Ben Hanten.

# BEN'S BREWING CO.

## Ben Hanten transforms Yankton's Freeman Building into a taproom and event venue

Billy Gibson

billy.gibson@sdrea.coop

Visitors to Ben's Brew Station in Yankton will find a number of mixed metaphors to stir the imagination.

There's the artwork hanging from the ceiling that depicts intriguing representations of various types of air craft, like a bi-plane made out of carpenter levels and a Spruce Goose replica with metal roller skate wheels for landing gear. The eclectic set of suspended sculptures represents the Freeman Company, an aerospace manufacturing business that once occupied the spacious building located on Walnut Street.

The name itself refers to the fact that the venue is situated a block away from an old railroad depot and there's a rail spur that enters the 28,500-sq. ft. building, which was used to convey products to the rail line for delivery to customers all across the country.

There's also a vintage vibe at play with a line of 1950s style pinball machines along one wall and pub games like darts, corn hole and bocce

Finally, there's the names of the brews, sure to pique a patron's

curiosity – descriptive designations such as Raspberry Porter, Bishop Marty, Walshtown Irish Red, Oktoberfest, West Side Live, Pineapple Heat, Strawberry Rhubarb, Slic and many more.

After 16 years owning and operating Ben's Brewing Company, Ben Hanten expanded his business by opening The Brew Station last summer. He acquired the building with the vision of creating a fun and energetic environment to serve custom brews while offering live music, games and menu options provided by local food trucks. Frequent vendors during weekends and special events include Grind N' Griddle, Broken Trellis, Up in Smoke and Windy City Bites. Popular entertainers such as Adam Moe and Shawn Coles have taken The Brew Station stage.

Customers come for the fun and fellowship but also for the craft beer and to see what new blends happen to be on tap. In October, for instance, a brew called Madcat Pumpkinslapper was on the menu through a collaborative effort with Jefferson Beer Supply and Madcat Pumpkin Patch. The blend included real pumpkins and gourds, and a number of spices like cinnamon, nutmeg, cloves and ginger.

Crafting new flavors never gets old

### THE BIG FOUR BREWS

Here are the top sellers at Ben's Brewing Company:

West Side Park IPA - The company's flagship product blends Dakota Challenger, Amarillo and Citra hops for a full juicy flavor with hints of orange, mango and grapefruit.

Kenny Pepper Cream Ale - the heat is on with this ale that's sure to warm the palate with roasted jalapenos and a hint

Kelly's Cove Golden Ale – a refreshing, easy-drinking ale with a light, delicate hop profile featuring Citra and Azacca and a smooth, clean finish.

Burleigh - a brown ale with a touch of roast, nuts and chocolate.

for Hanten. He enjoys visiting with customers, giving tours of the brewery and sharing stories of the building's history and colorful namesake, Edgar Freeman.

"He was quite a character," Hanten said. "We've learned a lot about him, and many of the employees who worked at The Freeman Company have added a lot of extra details, too. We started the bar 16 years ago, and it's fun to see it blossom into this," Hanten said.

Hanten reports that his brew revenue is up nearly 90 percent with plans to venture into the canning business in the coming year. He said customers can look for the Ben's Brewing Company label "anywhere you buy beer."

Each year, musicians and other entertainers from across the state perform for the tens of thousands of visitors who travel to Pierre to see the "Christmas at the Capitol" displays and decorations. Photo by Billy Gibson

## **Christmas at the Capitol: Celebrating 40 years** of yuletide splendor and dazzling displays

**Billy Gibson** 

billy.gibson@sdrea.coop

With all of its spectacular lights, familiar carols and colorful decorations, Christmas at the Capitol inspires thousands to become awash in the spirit of the season.

It's an especially magical and meaningful event for Moriah Gross, founder and director of the Pierre Youth Orchestra. Over the past decade, Gross and her students have performed in the Capitol Rotunda and added to the yuletide ambiance that more than 20,000 visitors travel from far and near to experience.

Gross is one of many performers slated to appear in the Rotunda as Christmas at the Capitol takes place from Nov. 23 through Dec. 26. Visitors to this year's celebration can expect to see brilliant hues of ruby, pink and pearl in recognition of the event's 40th anniversary.

"Winter Wishes" is the theme for 2021 as nearly 100 decorated trees will line the halls and fill the

historic structure. Local businesses and government agencies, non-profit organizations and other community groups from across the state will once again put their decorating skills to the test and give the Capitol and its environs a South Dakota Christmas flair.

This year's official lighting ceremony will take place on Tuesday, Nov. 23, at 7:30 p.m. The popular Pie Day is set for Saturday, Dec. 4, from 11 a.m. to 3 p.m., when complimentary slices of pie, cookies, coffee and ice cream will be offered along with live musical entertainment sure to spark the Christmas spirit.

Gross said she and her students look forward to the event each year, but one memory stands out for her among the rest. Two years ago, she accompanied a guest performer who sang the traditional carol Silent Night in the language of the Lakota Sioux.

"It was so spectacular and moving to be able to have that experience there inside the State Capitol and honoring the Lakota people and

culture, and also to have our students experience that as well," said Gross, a member of Oahe Electric Cooperative outside of Pierre.

A native of Kansas and accomplished string instrumentalist, Gross relocated to Pierre 10 years ago and soon realized there was no educational string program for public school students. So, she started the Pierre Youth Orchestra, which has nearly 40 students who are set to perform at the Capitol on Sunday, Dec. 19, at 5 p.m.

# THIS YEAR'S OFFICIAL LIGHTING CEREMONY WILL TAKE PLACE TUESDAY, NOV. 23, AT 7:30 P.M. THE **POPULAR PIE DAY IS SET** FOR SATURDAY, DEC. 4, FROM 11 A.M. TO 3 P.M.

Gross said while she calls the Capitol "one of my favorite places to perform," the experience is also beneficial for her music students in many ways.

"It's just the opportunity to play for

Nearly 100 trees are decorated by clubs, associations, non-profits and government agencies. Photo by Travel South Dakota.

an audience in this kind of setting. It's very intimate and not like playing on a stage in a large theater where the audience is sitting at a distance away from you," she said. "In the Rotunda, there are people all around, sometimes standing room only, and they're very close and intimate. It's an emotional time of year and you get to really connect with the audience. At the same time, they have to be disciplined and focused on what they're doing. It's a unique experience that a lot of students don't always get to have."

She said many students will return after they've graduated from the program and sit in on the performance and have their photos taken with the current crop of students at the Capitol.

Observing Christmas at the Capitol from behind the scenes, Gross noted the many individuals and volunteers who help make the event a success each year.

"I can't say enough about all the committees, greeters, volunteers, organizers and others around the

Approximate number of annual visitors 20,000 to the Christmas at the Capitol event.

community who make this possible for people coming in from all over the country and the world. You have the sights and sounds and scents of the pine trees, and it all adds up to a wonderful holiday experience," she said. "There are so many people who all work together to make this something special."

The annual holiday event started back in 1981 with a dozen decorated trees and has grown in popularity through the past 40 years. Visitors can look for some of the more popular recurring displays such as a set of hand-painted porcelain ornaments from the China Painters Organization and an old wooden nativity scene that the local Knights of Columbus group sets up on the second floor of the Capitol each year.

Those interested in serving as a volunteer for the event can contact rick.augusztin@state.sd.us.

The State Capitol grounds are also decorated to evoke the spirit of Christmas. Photo by Travel South Dakota.

# **Powerful Fun** Five cool uses to power your yuletide season

### Paul Wesslund

At the end of the year, thoughts of gifts dance in our heads, whether for others or just treating ourselves to the achievement of being able to turn the page on 2021.

Electricity offers one way to brighten the choices as inventors and innovators keep coming up with new gadgets and gizmos to power our lives with efficiency and fun. Here are five electric ideas to add pizazz to your holiday shopping list.

### **WALK THE TALK**

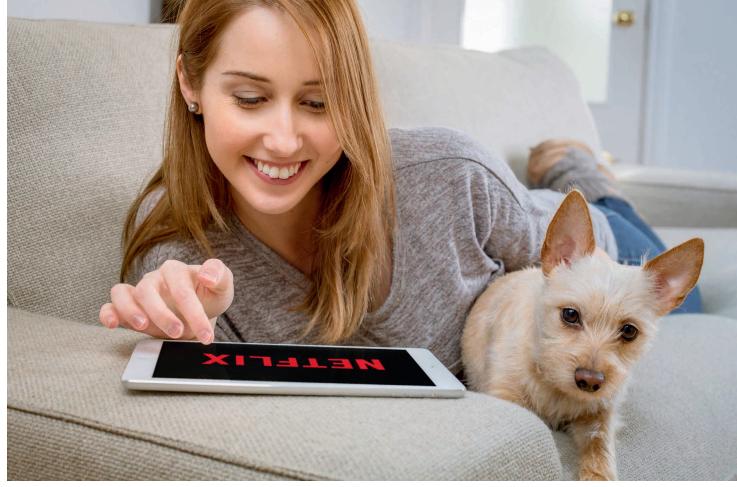

Walkie-talkies are one of those old technologies for staying in touch that still work great for businesses, conference coordination, or hiking and camping. They can help keep a caravan of cars and trailers together. Let the kids figure out games like hide-and-seek or scavenger hunts. There are even walkie-talkies that come in the shape of cartooncharacter heads, and they can be as inexpensive as \$50 for a set of four.

Shop carefully and know what you'll use them for - the range can vary from a half mile to up to 20 miles depending on the type of model you choose, and whether they'll be used indoors or outdoors.

### **HIT THE ROAD**

"Electric vehicles" doesn't mean just cars and trucks anymore. The sidewalks of college campuses and downtowns are now shared with electric scooters. And if you're having trouble keeping up with a bicycle-fanatic, an electric bike might help you scale those steep hills. You can go off-road

Walkie-talkies can be as inexpensive as \$50 for a set of four.

Tablets come in a variety of screen sizes that make it easier to enjoy movies, computer games and e-magazines.

with an electric All-Terrain Vehicle. If that doesn't sound like it fits the idea of zooming through the woods, consider that electrics are a lot quieter, whether you're out for hunting or bird watching. Wear a helmet and drive carefully - ATV safety applies to both gas and electric motors. And if you were born to be wild, you can head out on the highway on a battery-powered motorcycle - an electric Harley boasts instant 100 percent torque, electronic safety features and the ability to use your smartphone for checking battery status and stolenvehicle tracking.

### **EASY READER**

If being bent over a keyboard seems too much like work and you're tired of squinting at the little screen on your phone, take a look at tablets. They come in a variety of screen sizes that make it easier to enjoy that magazine, detective novel, streaming movie or TV show or your computer game of choice. Most models come with the ability for you to write or draw on them.

### **HEALTHY FRENCH FRIES?**

Electric air fryers have been around since 2010, but their popularity started taking off about five years ago. As health-consciousness increased, people liked the idea of these cookers that could prepare traditional fried favorites with much less oil. Sales bumped up even more as the pandemic kept people at

home and paying more attention to their cooking. Air fryers aren't really fryers but high-heat convection devices that simulate traditional recipes like chicken tenders, egg rolls, potato chips, fried vegetables and apple fritters. A friend of mine calls his electric air fryer "the greatest invention of all time."

### **PACKING POWER**

A portable charger may be one of the least-exciting gifts, but you'll change that thinking when your phone's about to die as you hike over a hill and see a sunset vista to photograph, or you're at a concert and they play that song you wanted to record. A word of advice charge it up the day before; the smallest ones for your purse or pocket tend not to hold a charge for the several weeks they sit in a drawer.

Shop carefully and know how you want to use the device - they all come with a variety of features and prices. And be cyber-safe: anything connected to the internet can be hacked, so set a strong password. Then focus on having a blast.

Badlands Observatory photographer Teresa Hofer captured this image of The Pleiades, also known as the Seven Sisters.

## Badlands Observatory welcomes stargazers, researchers and others interested in pursuing the field of astronomy

**Billy Gibson** 

billy.gibson@sdrea.coop

For centuries, astronomers have sought to find a scientific explanation for the Star of Bethlehem, which is described in the Gospel of Matthew as the celestial sign that led the Magi into the presence of the Christ child.

Some have speculated that the object high in the night sky could have been a supernova, a comet or possibly a conjunction of the planets Jupiter and

Accomplished astronomer Ron Dyvig has views of his own. As a researcher who adheres to scientific methods, he's a bit hesitant to plow into topics where science and faith may collide.

But when pressed to offer an educated opinion on the Christmas Star, he replies, "There are several elements that make it challenging to address from a scientific standpoint and there are a

half-dozen theories beyond what's there in the Biblical accounts. But I think it could have been a nova or the planet Venus. Venus can be remarkably bright after sunset when it appears to descend in the west for several weeks. That may have been what the Magi saw and would be something they could follow. But a lot of people have strong religious beliefs about it, and if you believe it was a miracle, then science can't really explain it adequately."

Dyvig is founder of the Badlands Observatory, which he opened for his own private viewing and independent research in 2000. Two years ago, he began renovating the facility located in the small community of Quinn just north of I-90, with the goal of one day welcoming members of the public interested in astronomy.

While the renovation project is not fully complete and a grand opening is set for next spring, Badlands

Observatory is now welcoming visitors by reservation only.

"Since we got settled into this facility, there has just been so much public interest in it that we decided to go public. It's as simple as that," Dyvig said. "Right now we're taking it slow with small groups. During the winter months our activities will be curtailed a bit, then we'll expect a busy spring."

A native of Deadwood, the 79-year old Dyvig took a keen interest in astronomy at an early age when he was

Teresa Hofer and Ron Dyvig are longtime collaborators who have opened the Badlands Observatory to public access.

introduced to the discipline by his local Boy Scout troop leader. He created his first observatory as a youngster when he made a concrete pad and a cylinder to hold his telescope in place in the middle of a rancher's field. During his high school and college years, he spent late nights scanning the skies, marveling at the vastness of the universe and hoping to discover new heavenly bodies.

As a college student, Dyvig learned and taught the art of telescope-making and became president of the Black Hills Astronomical Society. He later designed and fabricated the optics for the Hidden Valley Observatory in Rapid City.

Dyvig spent time honing his craft as a research assistant at the University of Arizona where he worked under several mentors and utilized the advanced facilities at Kitt Peak National Observatory. He was chosen to help design and test image intensifier camera systems for Steward Observatory.

While through the decades he kept day jobs to support his avocation, his evenings were spent star gazing and pursuing new discoveries. His passion and dedication to astronomy paid off when he discovered - and aptly dubbed - Asteroid 26715 South Dakota just a year after opening the Badlands Observatory. It's just one of the 25

Photographer Bob Rossiter and Ron Dyvig are shown with the 26-inch Newtonian Reflector telescope at Badlands Observatory.

discoveries credited to Dyvig during the course of his astronomy work.

Building the observatory was no small task. First, he found and converted an old medical building in Quinn to house the facility. Then he personally designed and fabricated all of the optics, including grinding and polishing the mirror for the 26-inch f/4.8 Newtonian Reflector telescope. West River Electric

> Cooperative worked with Dyvig and the town of Quinn to install hoods over surrounding street lights to reduce "light pollution" and enhance the ability to scan the night sky.

Dyvig describes himself as fortunate to find a partner in Teresa Hofer, a career accountant who shares his passion for all things celestial.

There's always something to be done at the observatory, Hofer said. Ongoing duties include maintaining and upgrading the optical and drive systems, control systems for the telescope and dome, facility management, designing and implementing new educational programs for visitors, website updates and keeping up-to-date on developments in the field of astronomy.

"There's plenty to do, especially since we decided to make the facility public after we figured people might like to see what we do," she said. "We had to make sure everything was comfortable for the public and do a lot of renovating and painting and upgrading."

Hofer said she is starting to promote the observatory as a destination for astronomy enthusiasts who might be interested in touring the facility and peering through one of seven telescopes on the observation deck. Dyvig is in the process of also building a radio telescope to add to his collection.

Those interested in experiencing the Badlands Observatory can call 605-381-1521 to set up a viewing time or visit www.badlandsobservatory.com.

The Orion Nebula has long captured the imaginations of star watchers as it has been associated with the Greek myth of a huntsman placed among the stars by Zeus.

Minnesota Ag Rural Leadership Class IX members develop problem-solving skills during a "Building Strong Teams" session.

# Working today to develop tomorrow's rural community leaders in South Dakota and Minnesota

Billy Gibson

billy.gibson@sdrea.coop

Success in any endeavor calls for solid leadership. Don Norton of the South Dakota Agricultural and Rural Leadership Program (SDARL) is eager to build better leaders who envision a more prosperous future for individuals, families and businesses across the state.

Norton believes leadership skills don't just materialize out of thin air. Those skills and abilities have to be taught. That's the goal of SDARL, an 18-month program that takes participants through an intensive course of conferences, class time and state, national and international seminars all designed to prepare the students to return to their communities and make positive contributions.

"You don't see SDARL graduates sitting on the sidelines," Norton

said. "They're stepping up to serve on commodity and corporate boards, in community organizations, in government and in their families, leading and taking action and inspiring others to do the same."

SDARL Class VII graduate Mike Traxinger of Claremont is doing anything but sitting on the sidelines. Traxinger is a fifth-generation farmer and rancher who also serves as general counsel and director of governmental affairs for Agtegra Cooperative. He recently joined the board of directors at Northern Electric Cooperative based in Bath, is past president of the American Agricultural Law Association, co-chair of the Agricultural Law Committee of the State Bar of South Dakota and a member of the South Dakota Farm Bureau, Farmers Union aand South Dakota Simmental Association.

"The SDRAL program really helped hone my leadership skills and gave me more insight into ways that I could make a difference that I hadn't thought of before," said Traxinger, who also serves as president of the South Dakota Association of Cooperatives. "Leadership is vital to the continued success of rural America, farming and ranching operations, and our communities. And programs like SDARL are very effective in developing strong leaders who have a passion for service and a heart for helping others succeed in a way that's beneficial for everyone."

The SDARL Foundation was created in 1998 under the first Executive Director Dr. Dan Gee, who stepped into the role after retiring from the Animal Science Department at South Dakota State University. The first class started in 2000 with participants representing a range of backgrounds including ranching, farming, banking, media, government and private business.

Dr. Gee was the leader of SDARL

### RURAL LEADERSHIP

Leadership students take a field tour of a logging operation in northern Minnesota.

in 2008 when Olga Brouwer went through the curriculum. Brouwer was so impressed with Dr. Gee and the program that she later went on to become leader of the Minnesota Agriculture Rural Leadership (MARL) and has held that position for the past 10 years. She points out that both the MARL and SDARL programs were formed on the same day 21 years ago and have graduated a combined 600 students during that time.

"I learned so much from Dr. Gee," said Brouwer, who once operated a dairy farm in Elkton. "He was supereducational and also provided a lot of insight into the political process, how to reach out. If you go and talk to legislators and staffers you find out there are reasons why things might not be working out so well. But in order to change things, you have to be at the table and be active, especially for cooperatives."

While both programs have similar structures and operate in similar fashion, Brouwer said MARL is affiliated with the University of Minnesota Extension and places a bit more stress on the academic side in the learning material.

Kylie and Jake Rieke are both graduates of the MARL program and leaders in their community. Along with raising corn and bean crops, Jake is chairman and a founding organizer of the R-S Fiber Cooperative while Kylie serves on the board of Renville-Sibley Cooperative Power Association based in Danube, Minn.

Jake participated in MARL from 2018 to 2020 and was impressed with what he gained from the program. His group traveled to Cambodia and Taiwan to examine their agricultural practices.

"It was a great experience. For us, it blew open an entire network of connected individuals to draw off their expertise and bounce ideas off of," he said. "Everybody in the group brings a unique background in different fields, so there are people you can call to ask questions or answer questions someone may have for you. It gives you a fast lane for networking and for getting your projects moving to accomplish whatever goals you have in front of you."

Neither SDARL nor MARL receive direct funds from state or federal governments to support their programming. Participants pay The number of years SDARL and MARL

have been developing community leaders

a percentage of the cost of going through the program but most funding comes from individuals, businesses and partnering organizations whose goal is to improve and develop rural communities.

One of those organizations standing in full support of both programs and the concept of rural leadership development is East River Electric Power Cooperative, which provides transmission, substation and distribution services for electric cooperatives in both states.

Those interested in investing in rural leadership through these programs can visit www.sdagleadership.com and www.marlprogram.org.

To have your event listed on this page, send complete information, including date, event, place and contact to your local electric cooperative. Include your name, address and daytime telephone number. Information must be submitted at least eight weeks prior to your event. Please call ahead to confirm date, time and location of event.
